Once again. Here we are on this. Any comments?

Subject: Fact Sheet on MultiRae vs. MiniRae

I realize this discussion has been brought up many times since we started doing air monitoring and most of the people on this message are probably in agreement, but the fact that we continue to experience the same issues day after day with our current setup makes it all the more relevant. The issue is utilizing MultiRae's as stand alone ambient VOC monitors, which they are not designed for. Warren suggested it and I thought it was a good idea for me to get with our START Air Boss and just write up a few bullets on the pros and cons of our current air monitoring configuration. See attached. Thanks.
